**80 Halifax Road, Todmorden 2mm scale**

### Notes:

- This is a **free** download from [www.hall-royd-junction.co.uk](http://www.hall-royd-junction.co.uk) to create a pair of buildings on Halifax Road, Todmorden, as they were in April 2013.
- It can be printed out, and assembled using the tabs provided to glue the wall sections together, and then fold over the two roof panels. There is an alternative left hand gable, which shows the modern stone finish and fire escapes.
- Or the parts can be cut out and then affixed to mounting board. A deluxe version can be created using two layers. Print out two copies, gluing the first onto mounting board and coat the windows with gloss varnish; affix the second sheet onto board and cut out the doors and windows, and glue onto the varnished sheet. Ridgetiles are provided in a separate strip to cover the join.
- Fold-up the chimney stacks, or mount onto board. On the prototype there is only one, mounted approximately 2mm inboard from the edge of the roof on the right hand side (looking from the front).
